**Notice of Fee Increase on January 1, 2003**

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-6, 8-24 and 26-70 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art references do not teach the applicant's invention. Neither White, Toyama, Loeven, Daly nor Cohen teach the combination of limitations as disclosed in claims 1, 18, 35 and 52, especially the limitation of "a violation prediction unit, responsive to said violation prediction image capturing device and an indication of said current traffic light phase, wherein said violation prediction unit is operative to generate a violation probability score for said at least one vehicle approaching said traffic signal, said violation probability score reflecting a likelihood that said at least one vehicle will violate a red light phase of said traffic signal". White discloses the documentation of traffic light violators while protecting non-violating drivers by using sensors. Toyama and Loeven disclose the monitoring of traffic light violators and speed of the violators using cameras and sensors. Daly discloses the capturing of images of red traffic violators with digital cameras. Cohen discloses the passive road sensor for automatically monitoring traffic violations by determining the time of impact. However, none of the prior art references teach the specifics of the aforementioned limitation "violation probability score".
3. Furthermore, since none of the prior art references teach the aforementioned limitation of generating a "violation probability score", the prior art also does not specifically teach the comparison of this "violation probability score" to a predetermined violation probability score threshold. Thus, the case has patentable merit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

White (US 6,100,819), Vehicular Traffic Signalization Method and Apparatus for Automatically Documenting Traffic Light Violations and Protecting Non-Violating Drivers;

Toyama (US 5,432,547), Device for Monitoring Disregard of a Traffic Signal;

Loeven (US 5,041,828), Device for Monitoring Traffic Violating and for Recording Traffic Statistics;

Daly et al. (US 5,948,038), Traffic Violation Processing System; and

Cohen et al. (US 6,075,466), Passive Road Sensor for Automatic Monitoring and Method Thereof.
